Profile

Full Stack Developer with 2.5 + years of experience building enterprise-grade applications using .NET Core and Angular. Experienced in designing scalable microservices, REST APIs, and real-time systems for clients like ICICI Bank and TAJ Hotels. Strong focus on performance optimization, clean architecture, and production deployments using Azure DevOps.

Professional Experience

09/2023 – present Pune, India	WYSE Biometrics Systems Pvt. Ltd, Software Developer - Developed and maintained scalable .NET Core Web APIs for the VMS Prime system. - Currently managing and supporting VMS Prime deployments for ICICI Bank and TAJ Hotels. - Designed and implemented a Meeting Room Management (MRM) microservice, enabling real-time room availability and conflict validation, improving scheduling reliability. - Built and optimized backend services using Entity Framework Core and SQL Server, ensuring efficient data handling and faster query performance. - Contributed to the ETAM Prime project, focusing on Angular-based frontend development to ensure responsive UI and enhanced UX. - Worked on the VMS Prime UI using Angular, delivering maintainable and efficient frontend modules. - Managed application releases using Azure Pipelines, artifact publishing, and PowerShell-based automated deployments across environments

Projects

VMS Prime, Visitor's Management System

Role: Full Stack Developer | **Client:** ICICI Bank, TAJ Hotels | **Technologies:** ASP.NET Core Web API, Angular, SQL

Key Responsibilities

- Developed and maintained **RESTful APIs** in **.NET Core** for modules like visitor registration, meeting request, employee approvals, and check-in/check-out processes.
- Collaborated with the frontend team to develop **responsive UI** components using **Angular** for the Visitor Dashboard, Visitor History, and Approval Workflows.
- Integrated the **MRM microservice** to manage real-time meeting room booking and availability — enabling secure inter-service communication.
- Implemented centralized logging using middleware to enhance **system monitoring and issue resolution**.

MRM, Meeting Room Management System

Role: Backend Developer | **Client:** ICICI Bank | **Technologies:** .NET Core Web API, SQL Server

Key Responsibilities

- Designed and implemented **MRM microservice** using **.NET Core Web API**, enabling centralized management of meeting room booking and validation logic.
- Used **Entity Framework Core** for database operations and optimized queries for faster room conflict checks.

Education

JSPM College, Hadpsar,

MCA(Master's in Computer Applications)

2024 – Present | Pune, India

S.M Joshi College, Hadpsar CGPA - 8.65,

BCA(Bachelor's in Computer Applications)

2019 – 2022 | Pune, India

Skills

Backend & APIs – C#, .NET Core, ASP.NET Core Web API, Entity Framework, RESTful APIs, ADO.NET

Frontend – Angular, TypeScript, JavaScript, HTML5, CSS3

Database – SQL Server

DevOps & Tools – Azure DevOps, CI/CD Pipelines, IIS Deployment, Git
